NGM Consulting Engineers
Zambia Limited

ABOUT NGM

NGM Consulting Engineers is a Zambian owned multi-disciplinary engineering consultancy delivering innovative and sustainable solutions in infrastructure development.

OUR MISSION

To provide innovative engineering solutions that enhance communities and improve lives.

OUR VISION

To be a leading engineering consultancy in Africa, recognized for excellence and sustainability.

OUR VALUES

- Integrity
- Excellence
- Innovation
- Teamwork
- Sustainability

BUILDING INFRASTRUCTURE. DELIVERING IMPACT.

NGM Consulting Engineers Ltd is a wholly owned Zambian Company that was originally established in England and Wales under the name NGM Bro Ltd. Since relocating to Zambia and incorporating on September 17, 2012, we have been delivering top-notch engineering services.

Our team consists of highly skilled professionals, and when specialized expertise is required, we engage professional expert personnel on contract. Our core focus lies in detail design and construction supervision of Civil, Civil Infrastructure (including water and wastewater supply, dams, roads), Building, and Mechanical/Electrical projects.

Additionally, we specialize in underground water monitoring, river modeling, water network modeling, environmental protection, GIS build, and structural designs.

WHY CLIENTS CHOOSE US

Proven Experience

Over 10 years of delivering a wide range of successful projects across Zambia and internationally.

Trusted Expertise

Deep technical knowledge and compliance with FIDIC international standards and best practices.

End-to-End Solutions

From feasibility studies, design and supervision to equipment supply and installation.

Commitment to Quality

We are dedicated to delivering innovative, sustainable, and cost-effective engineering solutions.

04 OUR SERVICES

We provide comprehensive engineering and consulting services across multiple sectors, delivering sustainable solutions that create lasting impact.

WATER & SANITATION

- Water supply & treatment
- Wastewater & sewage systems
- Stormwater drainage
- Environmental engineering
- Water resources management

SURVEYING & GIS

- Topographic surveys
- GIS mapping & spatial analysis
- Remote sensing
- Land & utility mapping

TRANSPORTATION INFRASTRUCTURE

- Roads & highways
- Bridges & culverts
- Urban roads & streets
- Mobility & transport planning

PROJECT MANAGEMENT & SUPERVISION

- Construction supervision
- Project management
- Contract administration
- Quality assurance & control

BUILDINGS & STRUCTURES

- Commercial buildings
- Residential developments
- Institutional buildings
- Industrial facilities
- Structural design & analysis

DIGITAL & SMART SOLUTIONS

- Smart infrastructure
- Hydraulic modelling
- SCADA systems
- Digital engineering solutions

Delivering innovative solutions that enhance infrastructure, empower communities and build a sustainable future.

05 FEATURED PROJECTS

Delivering impact through quality engineering solutions across Zambia and beyond.

01 NKANA EAST WATER TREATMENT PLANT

Design and construction supervision of a 6,000 m³/day treatment plant including rapid mix chamber, flocculation, sedimentation, filtration and chlorination works.

Client: NWASCO

Location: Kitwe, Zambia

Year: 2022

02 17TH AVENUE ELEVATED WATER TANK

Construction of a 3.5m elevated concrete water tower, pump installation, and reservoir upgrades to boost pressure in Kitwe.

Client: Kitwe City Council

Location: Kitwe, Zambia

Year: 2021

03 BULANGILO WTP REHABILITATION

Supervision of rehabilitation works including new raw water pumps, filter and clarifier repairs, and electrical upgrades.

Client: NWASCO

Location: Chingola, Zambia

Year: 2021

04 NKANA WATER PIPELINES

Supervision of water pipeline installation linking new tanks and distribution centres.

Client: NWASCO

Location: Kitwe, Zambia

Year: 2021

05 URBAN ROAD WORKS

Design and supervision of urban roads, drainage systems, and associated infrastructure.

Client: Various

Location: Multiple Sites

Year: Ongoing

06 OUR APPROACH

A proven process that ensures quality, sustainability and value in every project.

- **01 UNDERSTAND**
We engage with clients and stakeholders to understand needs and challenges.
- **02 PLAN**
We develop smart, sustainable and cost-effective engineering solutions.
- **03 DESIGN**
Our designs integrate innovation, quality and practical functionality.
- **04 DELIVER**
We supervise and manage projects to ensure quality, safety and timely delivery.
- **05 SUSTAIN**
We build solutions that create lasting value for communities and the environment.

“

Engineering solutions that connect people, improve lives and build the future.

WHY CHOOSE US

We combine local knowledge with technical expertise to deliver reliable, innovative and sustainable engineering solutions.

EXPERIENCED TEAM

Qualified professionals with diverse expertise and hands-on experience.

INNOVATIVE SOLUTIONS

We use the latest technologies and best practices to deliver smart solutions.

QUALITY ASSURANCE

Committed to the highest standards of quality, safety and compliance.

SUSTAINABILITY FOCUSED

Delivering solutions that are environmentally responsible and socially impactful.

CLIENT COMMITMENT

We build lasting relationships through integrity, transparency and results.

LOCAL PRESENCE, WIDER IMPACT

Proudly Zambian, delivering value across the region and beyond.

08 WATER & SANITATION

We provide end-to-end water and sanitation solutions that promote public health, protect the environment and improve quality of life.

OUR SERVICES

WATER SUPPLY SYSTEMS

Planning, design and construction of sustainable water supply systems.

WATER TREATMENT PLANTS

Design and supervision of reliable and cost-effective treatment solutions.

SEWERAGE SYSTEMS

Design and construction of sewer networks and pumping stations.

STORMWATER DRAINAGE

Design of effective drainage systems to manage stormwater run-off.

SANITATION FACILITIES

Design and construction of hygienic and durable sanitation facilities.

ENVIRONMENTAL PROTECTION

Solutions that safeguard water resources and promote environmental sustainability.

TYPICAL PROJECTS

- ✓ Water Treatment Plants
- ✓ Elevated Water Tanks
- ✓ Borehole Drilling & Equipping
- ✓ Water Reticulation Networks
- ✓ Sewer Reticulation & Pump Stations
- ✓ On-site Sanitation Systems

Delivering clean water and safe sanitation for healthier communities.

09 SUSTAINABLE SOLUTIONS

We integrate sustainability into every project, creating solutions that balance engineering excellence with environmental and social responsibility.

OUR COMMITMENT

ENVIRONMENTAL STEWARDSHIP

Protecting natural resources and minimizing environmental impact through responsible engineering.

SOCIAL IMPACT

Improving community health and wellbeing through reliable water and sanitation infrastructure.

ECONOMIC VALUE

Delivering cost-effective solutions that support long-term growth and economic development.

QUALITY & SAFETY

Upholding the highest standards of quality, safety and compliance in all our projects.

INNOVATION FOR THE FUTURE

Applying innovative technologies and best practices to build resilient and future-ready infrastructure.

OUR VISION

To be a leading consulting engineering firm recognized for delivering innovative, sustainable and impactful solutions that transform communities across Africa.

OUR MISSION

To provide quality engineering services that enhance access to clean water and sanitation through innovation, integrity and excellence.

Building a better tomorrow through sustainable engineering today.

OUR PILLARS

WATER SECURITY

Providing reliable and sustainable water solutions for communities.

SANITATION FOR ALL

Promoting safe and dignified sanitation services for a healthier society.

ENVIRONMENTAL CARE

Protecting ecosystems and promoting sustainable resource management.

COMMUNITY EMPOWERMENT

Empowering communities through infrastructure that improves lives and creates opportunities.

10 EXCELLENCE IN EXECUTION

We combine technical expertise, effective management and strict quality control to deliver projects that meet client expectations and stand the test of time.

QUALITY

We adhere to international standards and best practices.

SAFETY

We prioritize the safety of our people, clients and communities.

ON TIME

We deliver projects on schedule and within budget.

INTEGRITY

We build trust through transparency, accountability and ethical practices.

**Engineering solutions.
Building communities.
Changing lives.**

Strong partnerships.
Smarter solutions.
Lasting impact.

11 PARTNERSHIPS THAT DELIVER

We build lasting relationships with our clients, partners and communities based on trust, collaboration and shared goals. Together, we create solutions that make a real difference.

OUR PARTNERS

Government of Zambia

Ministry of Water Development
& Sanitation

World Bank

Funding partner for water

12 DRIVEN BY PURPOSE

We are more than engineers – we are problem solvers, innovators and partners in progress. Our purpose is to design solutions that improve lives and build a better, more sustainable world.

“Engineering with passion. Delivering with pride. Building a legacy of impact.”

OUR APPROACH

UNDERSTAND
We listen, engage and understand your challenges and goals.

ANALYZE
We research and analyze to develop innovative and feasible solutions.

DESIGN
We create practical, sustainable and cost-effective engineering designs.

IMPLEMENT
We manage and supervise projects with precision, safety and care.

DELIVER IMPACT
We deliver solutions that improve lives and drive long-term sustainable growth.

SECTORS WE SERVE

WATER & SANITATION

INFRASTRUCTURE & DRAINAGE

CIVIL ENGINEERING

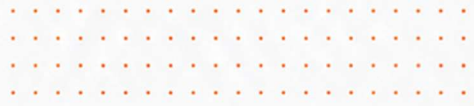

ENVIRONMENT & SUSTAINABILITY

COMMUNITY DEVELOPMENT

We value the trust our clients place in us. Every project is an opportunity to build relationships that last.

13 IRRIGATION & AGRICULTURAL WATER ENGINEERING

We design and deliver efficient, resilient and sustainable irrigation solutions that maximize agricultural productivity, conserve water resources and strengthen food security for communities and agribusinesses.

“
Engineering sustainable water solutions that empower agriculture and strengthen communities.
”

OUR IRRIGATION ENGINEERING SERVICES

DESIGN & OPTIMIZATION

Design and optimization of irrigation systems for large scale and commercial farms.

HYDRAULIC MODELLING & OPTIMIZATION

Advanced modelling to optimize flows, pressure and irrigation performance.

IRRIGATION SYSTEMS

Efficient drip, sprinkler and micro-irrigation solutions to improve water use efficiency.

SMART IRRIGATION MONITORING

IoT-enabled monitoring and automation for real-time decision making and water savings.

PUMPING & PIPELINE SYSTEMS

Reliable, energy-efficient pumping stations, rising mains and distribution networks.

WATER STORAGE & BALANCING

Reservoirs, balancing dams and storage solutions for year-round water availability and system stability.

OUR CAPABILITIES

WATER EFFICIENCY OPTIMIZATION
Develop solutions that reduce water losses and maximize crop yields.

GIS-BASED PLANNING
Geospatial analysis for site selection, command area mapping and infrastructure planning.

SMART TECHNOLOGIES
Integration of SCADA, sensors and IoT for precision irrigation management.

ENERGY EFFICIENCY
Energy-efficient pumping and system design to reduce operational costs and carbon footprint.

SUSTAINABLE AGRICULTURE
Supporting climate-resilient and sustainable agriculture for future generations.

14 DIGITAL ENGINEERING & SMART INFRASTRUCTURE

We harness digital technologies and smart systems to design, operate and optimize water and infrastructure assets. Our integrated digital engineering solutions enable real-time monitoring, smarter decisions and sustainable service delivery.

“
Smart systems.
Real-time insights.
Smarter decisions
for a better future.”

OUR DIGITAL ENGINEERING SERVICES

SCADA SYSTEMS

Design and integration of SCADA systems for real-time monitoring and control of infrastructure assets.

GIS & SPATIAL ANALYTICS

Geospatial data collection and analysis for informed planning, modelling and decision-making.

IOT-ENABLED MONITORING

IoT sensors and telemetry for continuous monitoring of flow, pressure, water quality and asset performance.

DATA ANALYTICS & DASHBOARDS

Advanced analytics and custom dashboards for performance tracking and operational insights.

PREDICTIVE MAINTENANCE

Condition monitoring and predictive maintenance to reduce downtime and extend asset life.

DIGITAL TWINS & MODELLING

Digital twin models and hydraulic simulations to optimize designs, operations and future planning.

SMART PREPAID WATER METERING

Smart metering and prepaid solutions to improve billing accuracy, revenue collection and water accountability.

CYBERSECURITY & DATA MANAGEMENT

Secure data management, cybersecurity and system reliability to protect critical infrastructure.

OUR DIGITAL CAPABILITIES

REAL-TIME MONITORING

Live monitoring of assets and networks for immediate visibility and control.

INTEGRATED SYSTEMS

Seamless integration of SCADA, GIS, IoT and enterprise systems.

OPERATIONAL EFFICIENCY

Optimized operations through data-driven insights and automation.

COST SAVINGS

Reduced operating costs through leakage detection, energy management and predictive maintenance.

SUSTAINABLE PERFORMANCE

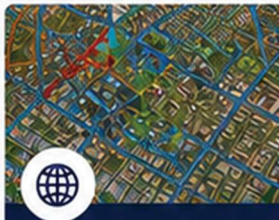

Smarter resource management for sustainable and resilient infrastructure.

SELECTED SMART INFRASTRUCTURE PROJECTS

SCADA IMPLEMENTATION

SCADA system for water treatment plant monitoring and process control.

GIS ASSET MAPPING

Comprehensive GIS mapping for water distribution network assets.

SMART METERING

Prepaid smart metering solution for improved revenue collection.

IOT WATER MONITORING

IoT-based monitoring of reservoir levels, pressure and water quality.

PREDICTIVE MAINTENANCE

Predictive maintenance system for pumps and electromechanical assets.

15 ENVIRONMENTAL ENGINEERING & CLIMATE RESILIENCE

We integrate environmental stewardship into every project we deliver. Our solutions protect natural resources, mitigate climate impacts and promote resilient and sustainable communities for generations to come.

“
Protecting the environment today for a sustainable tomorrow.”

OUR ENVIRONMENTAL SERVICES

ENVIRONMENTAL IMPACT ASSESSMENTS (EIA)

Comprehensive impact assessments to ensure regulatory compliance and responsible project development.

ECOLOGICAL RESTORATION & BIODIVERSITY

Restoring ecosystems, protecting biodiversity and enhancing natural habitats.

WATER RESOURCE MANAGEMENT

Sustainable management of surface and groundwater resources for long term availability.

CLIMATE RESILIENCE & ADAPTATION

Designing infrastructure and systems that withstand climate variability and future risks.

WASTE MANAGEMENT & POLLUTION CONTROL

Integrated waste management solutions and pollution prevention strategies.

ENVIRONMENTAL MONITORING & COMPLIANCE

Continuous monitoring, reporting and compliance with national and international standards.

CLIMATE CHANGE MITIGATION

Solutions that reduce emissions, enhance resilience and support low-carbon development.

SUSTAINABLE INFRASTRUCTURE SOLUTIONS

Green infrastructure designs that conserve resources and support circular economy principles.

OUR ENVIRONMENTAL CAPABILITIES

WATER PRESERVATION

Protecting rivers, wetlands and aquifers through sustainable management practices.

GROUNDWATER RECHARGE

Promoting natural recharge and responsible groundwater extraction.

CLIMATE MITIGATION

Supporting low-carbon solutions and renewable energy integration.

RESOURCE EFFICIENCY

Optimizing energy, water and materials for efficient and sustainable use.

ENVIRONMENTAL COMPLIANCE

Adhering to ZEMA, WHO, IFC and other international environmental standards.

SELECTED ENVIRONMENTAL & SUSTAINABILITY PROJECTS

WATER RESOURCE MANAGEMENT STUDY
Surface & Groundwater Assessment

ENVIRONMENTAL IMPACT ASSESSMENT
EIA for Infrastructure Projects

WASTE MANAGEMENT PROGRAMME
Pollution Control & Waste Reduction

CLIMATE RESILIENCE SOLUTIONS
Adaptive Infrastructure Design

ENVIRONMENTAL MONITORING SYSTEM
Real-time Monitoring & Reporting

16 MECHANICAL & ELECTRICAL ENGINEERING

POWERING INFRASTRUCTURE

We deliver reliable mechanical and electrical solutions that ensure efficient performance, safety and sustainability of water, wastewater and infrastructure systems. From concept to commissioning, we provide integrated designs and installations that stand the test of time.

OUR M&E ENGINEERING SERVICES

PUMPING STATIONS & PUMP SYSTEMS

Design, supply and installation of pumping systems for water supply, irrigation and wastewater.

ELECTRICAL MACHINERY & EQUIPMENT

Supply, installation and maintenance of motors, generators and rotating equipment.

ELECTRICAL POWER SYSTEMS

Design of LV/MV power distribution, transformers, switchgear and backup power systems.

CABLES & WIRING INSTALLATION

Professional installation of power and control cables for industrial and infrastructure systems.

CONTROL PANELS & AUTOMATION

Design and manufacture of MCCs, VFD panels and PLC control panels.

MECHANICAL INSTALLATIONS & PIPEWORK

Design and installation of pipework, valves, fittings and mechanical components.

INSTRUMENTATION & PROCESS CONTROL

Instrumentation, sensors and process control solutions for accurate monitoring.

TESTING, COMMISSIONING & MAINTENANCE

Testing, commissioning and maintenance to ensure system reliability and longevity.

SELECTED M&E PROJECTS

PUMPING STATION INSTALLATION

Design, Supply & Installation of Pumping Systems

CONTROL PANEL SYSTEMS

MCC, PLC & VFD Panel Design and Manufacturing

PIPEWORK & VALVE INSTALLATION

Mechanical Installation & Integration Works

POWER BACKUP SYSTEMS

Generator & Backup Power System Solutions

TESTING & COMMISSIONING

System Testing, Commissioning & Performance Verification

Reliable systems.
Efficient operations.
Sustainable performance.

OUR M&E CAPABILITIES

RELIABLE & SAFE SYSTEMS

Engineering solutions designed to meet international safety and performance standards.

ENERGY EFFICIENCY

Solutions that reduce energy consumption and optimize operational efficiency.

INTEGRATED SOLUTIONS

Seamless integration of mechanical, electrical and control systems.

QUALITY & COMPLIANCE

All works executed to IEC, ZESCO, WHO, ISO and other international standards.

EXPERT INSTALLATION & SUPPORT

Skilled team for installation, commissioning and after-sales support.

17 INTERNATIONAL EXPERIENCE

**GLOBAL EXPERTISE.
LOCAL IMPACT.**

NGM Consulting Engineers combines local knowledge with international exposure to deliver world-class engineering solutions. Our experience spans Africa and Europe, working with leading clients, consultants and contractors on complex infrastructure and water projects.

“
Delivering engineering excellence across borders. Building partnerships that transform communities.”

WHERE WE HAVE WORKED

<p>ZAMBIA</p> <p>Extensive experience in water supply, wastewater, irrigation and infrastructure projects nationwide.</p>	<p>MOZAMBIQUE</p> <p>Water supply extension projects and technical consultancy for major infrastructure programs.</p>	<p>ANGOLA</p> <p>Design review and consultancy services on water and infrastructure development projects.</p>	<p>ENGLAND</p> <p>Successful delivery of water and infrastructure projects with UK water utilities and authorities.</p>	<p>Experience with Scottish and Scottish Water on clean water and wastewater infrastructure.</p>

OUR GLOBAL STRENGTH

- INTERNATIONAL STANDARDS**
We apply global best practices, FIDIC standards and international engineering principles.
- STRATEGIC PARTNERSHIPS**
We collaborate with leading international consultants, contractors and technology providers.
- CROSS-BORDER EXPERIENCE**
Our team has successfully delivered projects in Africa and Europe across various environments.
- ADAPTIVE SOLUTIONS**
We tailor innovative solutions to meet the unique technical, social and regulatory needs of each region.
- RESULTS THAT LAST**
Delivering sustainable infrastructure that improves lives and drives long-term economic growth.
